NOTE: A List of Effective pages will be in the front of each chapter.

B4

Basic publications are assigned a part number which appears on the title page with the date of the issue. Subsequent revisions are identified by the addition of a revision code after the part number. A1 after a part number denotes the first revision to the basic publication, A2 the second, etc. Occasionally, it is necessary to completely reissue and reprint a publication for the purpose of obsoleting a previous issue and outstanding revisions thereto. As these replacement reissues are made, the code will also change to the next successive letter of the alphabet at each issue. For example, B for the first reissue, C for the second, etc.

When ordering a handbook, give the basic number, and the reissue code when applicable, if a complete up-to-date publication is desired. Should only revision pages be required, give the basic number and revision code for the particular set of revision pages you desire.

LIST OF EFFECTIVE REVISIONS

Always destroy superseded pages when you insert revised pages.

"END"

INTRODUCTION

The purpose of this catalog is to provide a method for identifying and ordering spare parts for your BEECHCRAFT STARSHIP 1.

WARNING

Illustrations in this catalog are to be used only as aids in identifying parts and must not be used as a maintenance reference for reassembly.

This parts catalog is supplemented by the following publications: The BEECHCRAFT STARSHIP 1 Maintenance Manual, P/N 122-590013-21;
The BEECHCRAFT STARSHIP 1 Wiring Diagram Manual, P/N 122-590013-13;
The BEECHCRAFT STARSHIP 1 Component Maintenance Manual, P/N 122-590013-9;
The BEECHCRAFT STARSHIP 1 Structural Repair Manual, P/N 122-590001-17.

Refer to The BEECHCRAFT STARSHIP 1 Component Maintenance Manual for illustrated parts breakdown of some specific assemblies not illustrated in this parts catalog.

ORGANIZATION

This illustrated parts catalog is prepared in accordance with the ATA (Air Transport Association) Specification No. 100 format.

The contents are organized at four levels as follows:

GROUP - identified by blue divider tabs. These are primary divisions of the manual that enable broad separation of content. Typical of this division is the separation between the Airframe Systems and the Power Plant.

CHAPTER - identified by yellow divider tabs. The various groups are broken down into major systems such as Air Conditioning, Electrical Power, Landing Gear, etc. The systems are arranged more or less alphabetically rather than by precedence or importance. They are assigned a number, which becomes the first element of a standardized numbering system. Thus, the element "28" of the number 28-00-00 refers to the chapter "Fuel". Everything concerning the fuel system will be covered in this chapter.

SUB-SECTION - The major systems of an airplane are broken down into sub-sections, and are identified by the second element of the standardized numbering system. The number "40" of 28-40-00 identifies the indicating portion of the fuel system.

UNIT - The individual units within a sub-section may be identified by the third element of the standard numbering system, such as 28-40-01. The number "01" is assigned by the manufacturer and may, or may not, be used and will vary in usage.

APPLICATION

Any publication conforming to GAMA or ATA 100 format utilizes the same basic numbering system, even though some chapters may be omitted because they are not applicable to that airplane or publication. Thus, whether the publication is a Maintenance Manual, a Parts Catalog, or a Wiring Diagram Manual, a person requiring information concerning the fuel storage or fuel indicating portion of the fuel system would refer to Chapter 28, FUEL.

For example:

28-00	General
28-10	Storage (Tanks, cells, necks, caps, etc.)
28-20	Distribution (Fuel lines, pumps, valves, controls etc)
28-30	Dump (If in-flight dumping system is installed, it would appear in this section
28-40	Indicating (Quantity, temperature, pressure etc., does not include engine fuel flow or pressure

Carrying this example further, fuel indication, fuel control panel, could be assigned the number 28-41-01.

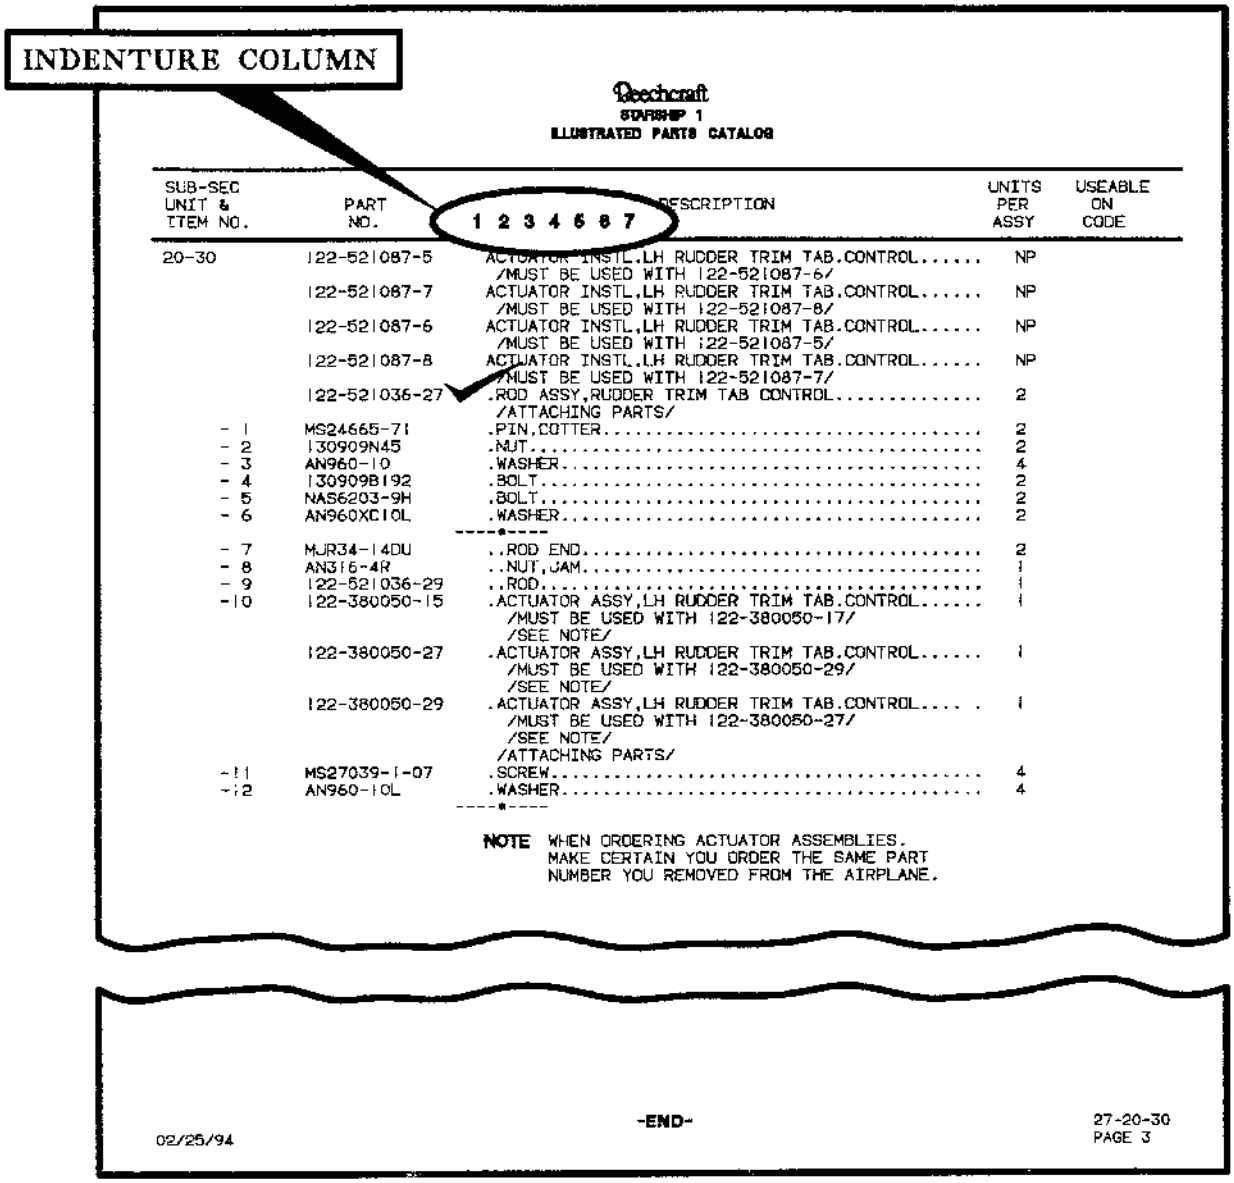
LIST OF EFFECTIVE REVISIONS

The List of Effective Revisions following the logo page of the manual lists the revisions currently effective for the manual.

RECORD OF REVISIONS

A Record of Revisions Page is provided following the List of Effective Revisions ("A") Page. When a revision is inserted, the revision number, the date the revision is inserted into the manual, and the initials of the person(s) inserting the revision should be recorded on this page.

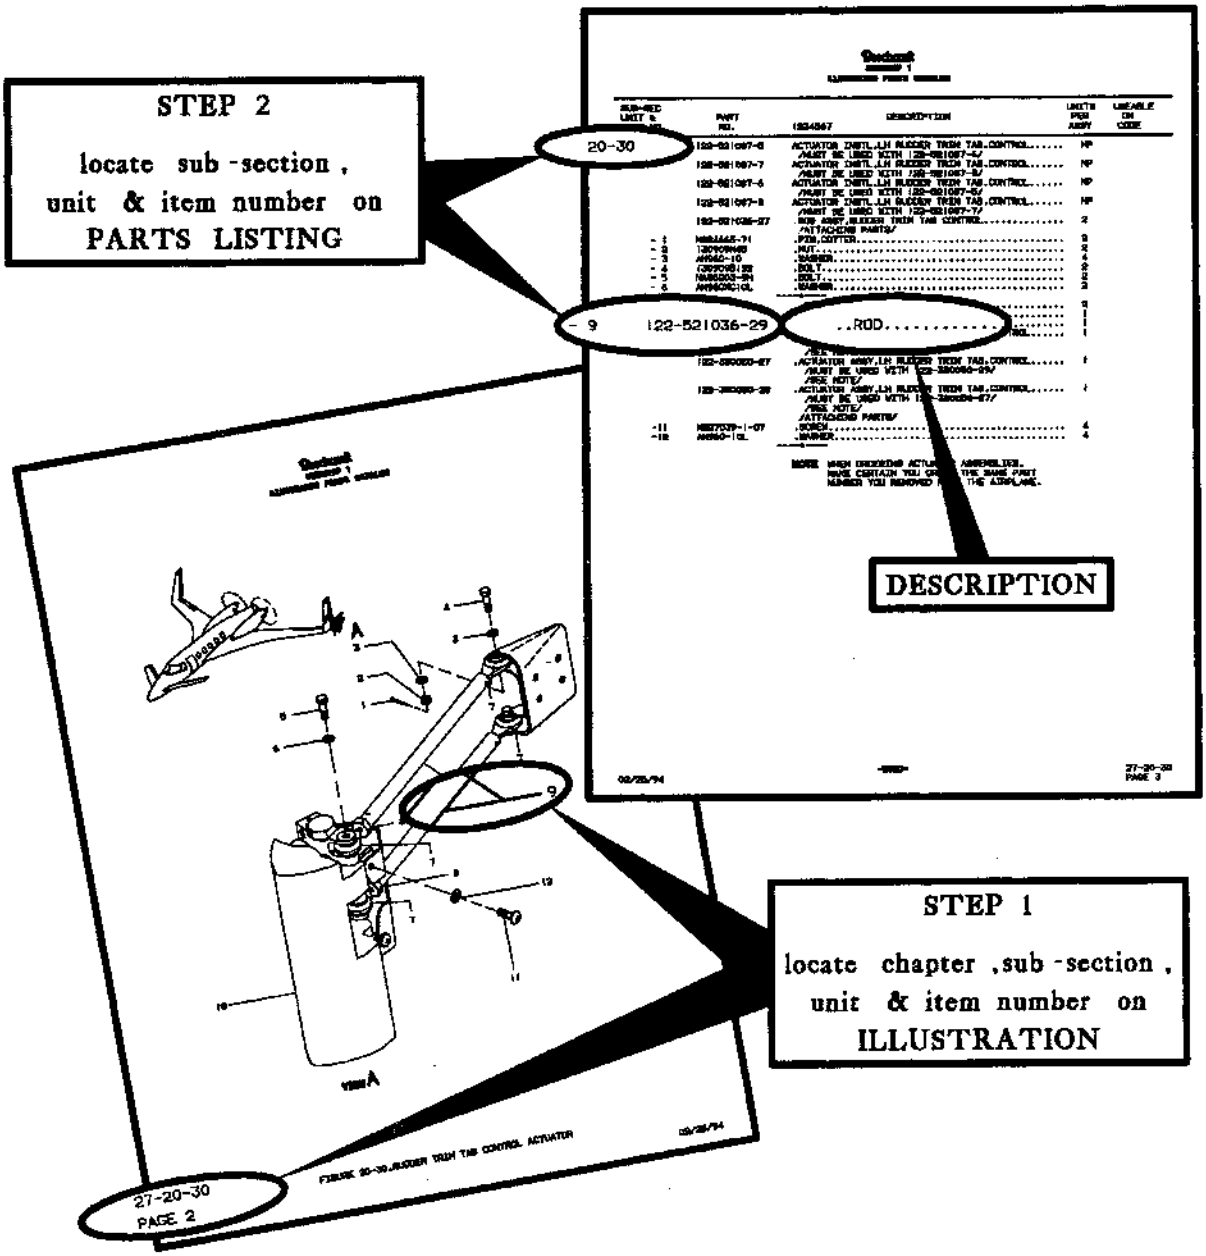
USING THIS CATALOG



C93NC00A4578 C

The above example from Chapter 27 mirrors the indenture system used to indicate parts included in any given assembly. By this indenture system, parts shown in column 2 are component parts of the immediately preceding assembly in column 1. Parts shown in column 3 are component parts of the immediately preceding assembly in column 2, etc., through column 7. As an example, if the 122-521036-27 rod assembly (see checked item in the above example) is ordered, it would include items 7 through 9. Note that items 1 thru 6, (attaching parts) are not a part of the rod assembly. There may be instances when a part number consists of more than 16 characters; in that case an asterisk (*) will appear at the end of the part number and the remainder of the number will be shown in the description field.

LOCATING A PART WHEN THE DESCRIPTION IS KNOWN



C93NC00A4579 C

Consult the list of pages and the table of contents in the front of each chapter for the sub-section and unit in which the part is listed. Immediately preceding the parts list page is an illustration with the index numbers for the various components (see step 1 in the example above). The item number adjacent to the part illustration will appear on the parts list page under the column heading GAMA/ATA CODE & INDEX NO (see step 2 above). Immediately to the right of the index number is the appropriate part number.

NOTE

Neither Service Publications, Reissues, nor Revisions are automatically provided to the holders of this manual. For information on how to obtain "Revision Service" applicable to this manual, consult any BEECHCRAFT Authorized Outlet, or refer to the latest revision of BEECHCRAFT Service Bulletin No. 2001.

ATA-100 SYSTEM - CHAPTER INDEX GUIDE

The ATA-100 System-Chapter Index Guide is a listing of the Groups, Chapters, Sub-Sections and Units which are applicable to this manual. The Chapter Index Guide is located in and is part of this Introduction.

ALPHABETICAL INDEX

The Alphabetical Index is a listing of component items or systems and the Chapter, Sub-Section and Unit in which they can be located. The Alphabetical Index is located in and is part of this Introduction.

ALPHA-NUMERIC INDEX

The Alpha-Numeric Index, contained in volume one only, is a complete alpha-numerical listing in tabular form of each part number listed, except those identified as attaching parts. Parts common to more than one chapter or assembly will be listed once for each time the part appears in order to reflect the different chapters, sub-sections, etc.

The Alpha-Numeric Index follows this Introduction.

LIST OF PAGES AND TABLE OF CONTENTS

The List of Pages and Table of Contents following each chapter divider tab, lists the issue date of each page that is effective for that chapter, the titles and, if applicable, the serial effectivity of the unit(s) covered in that chapter.

ILLUSTRATED PARTS LIST

The Illustrated Parts List consists of installations broken down into assemblies, sub-assemblies, detail parts, and attaching parts. A separation symbol (---*---) follows the listing of attaching parts to distinguish them from the assembly breakdown.

If two assemblies are made up of a majority of identical parts, or the assemblies are opposite, i.e., left and right hand, the assemblies are listed together with their detail parts listed as common for both assemblies. In this case only the left or right hand part, but not both, is indexed and illustrated, with the difference between left and right hand parts noted in the description column. The Units Per Assembly column indicates the number of detail parts required per assembly, NP indicates "Non Procurable" and AR indicates "As Required". The notation "(See Chapter)" indicates that this assembly and its detail parts are illustrated and broken down in another chapter or another subsection and unit within the same chapter.

When a number is shown in the Usable On Code Column, refer to the Codes of Effectivity at the end of the listing of parts for that particular unit to determine airplane serial effectivity. Each unit has its own distinct coding, i.e., the code number denoting airplane serial effectivity for one unit may not be the same for another unit.

SUPERSEDED PART NUMBERS

Superseded Part Numbers will appear in the Alpha-Numeric Index with the letter "S" just to the left of the number. They should also appear in the description field of the parts list, for example "...BOLT/supersedes AN3-7/". In this instance, AN3-7 would be the superseded number.

REVISED LINES

Revised Lines in the Parts List are indicated by the letter "R" appearing just to the left of the part number column. The letter "R" indicates that the line has either been revised or added.

ATA 100 PAGE BLOCK GUIDE

Pages are numbered consecutively for each unit beginning with page 1. The end of each unit is designated by the word "END".

An example:

28-10-01	Page 1	Title
28-10-01	Page 2	Illustration
28-10-01	Page 3	Text
		END

(Continued)

An example:

28-10-10	Page 1	Title
28-10-10	Page 2	Illustration
28-10-10	Page 3	Text
		END
28-10-20	Page 1	Title
28-10-20	Page 2	Illustration
28-10-20	Page 3	Text
28-10-20	Page 4	Illustration
28-10-20	Page 5	Text
		END

HOW TO LOCATE A PART WHEN THE PART NUMBER IS KNOWN

If the part number is known and the Illustrated Parts List must be consulted for model applicability or description, refer to the Alpha-Numeric Index for the Chapter, Sub-Section, Unit, and Item Number of the required part. Refer to the example.

IMPORTANT WHEN ORDERING PARTS

Always use the COMPLETE manufacturer's part number listed in the Part Number column. Be sure the "Airplane Serial Number" accompanies all spare parts orders.

Delays in filling spare parts orders often occur as a result of incomplete information being furnished with the original order, i.e., lack of model designation and airplane serial number. This information is provided on the serial placard located on the underside of the aft fuselage forward of the ventral fin, and indicated by check marks on the example.

NOTE

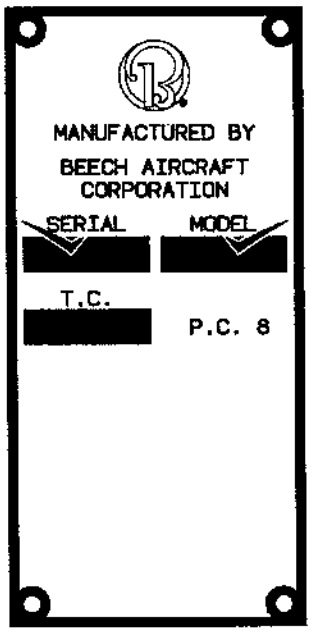
It shall be the responsibility of the owner/ operator to ensure that the latest revision of publications referenced in this handbook are utilized during operation, servicing, and maintenance of the airplane.

NOTICE

Beech Aircraft Corporation expressly reserves the right to supersede, cancel and/or declare obsolete any part, part numbers, kits or publications that may be referenced in this manual without prior notice.

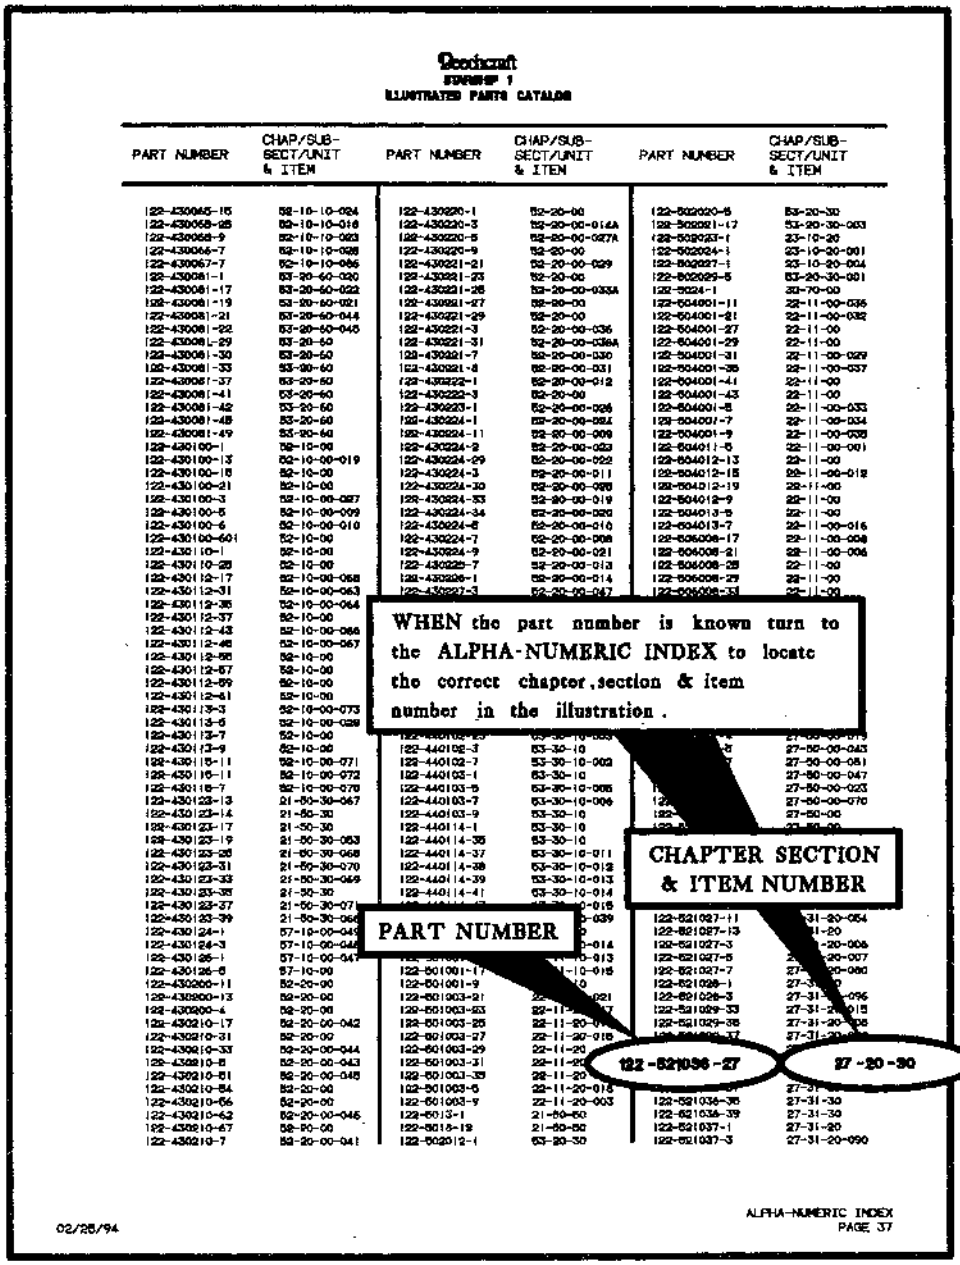
MICROFICHE/AEROFICHE

The General Aviation Manufacturers Association has developed a specification for microfiche and registered the name Aerofiche for use by all GAMA Members. This manual is available on Aerofiche or on paper, and either form of this manual may be obtained from any BEECHCRAFT Authorized Outlet.



C93NC00A458 I C

LOCATING A PART WHEN THE PART NUMBER IS KNOWN



C93NC00A4580 C

If the part number is known and the Illustrated Parts List must be consulted for model applicability or description, refer to the Alpha-Numeric Index for the Chapter Sub-Section, Unit and Item Number of the required part. The above example represents a typical page from an Alpha-Numeric Index.

WARNING

Use only genuine BEECHCRAFT or BEECHCRAFT approved parts obtained from BEECHCRAFT approved sources, in connection with the maintenance and repair of Beech airplanes.

Genuine BEECHCRAFT parts are produced and inspected under rigorous procedures to insure airworthiness and suitability for use in Beech airplane applications. Parts purchased from sources other than BEECHCRAFT, even though outwardly identical in appearance may not have had the required tests and inspections performed, may be different in fabrication techniques and materials, and may be dangerous when installed in an airplane.

Salvaged airplane parts, reworked parts obtained from non-BEECHCRAFT approved sources, or parts, components, or structural assemblies, the service history of which is unknown or cannot be authenticated, may have been subjected to unacceptable stresses or temperatures or have other hidden damage, not discernible through routine visual or usual nondestructive testing techniques. This may render the part, component or structural assembly, even though originally manufactured by BEECHCRAFT, unsuitable and unsafe for airplane use.

BEECHCRAFT expressly disclaims any responsibility for malfunctions, failures, damage or injury caused by use of non-BEECHCRAFT approved parts.

ATA-100 SYSTEM - CHAPTER INDEX GUIDE

The Following Is An ATA-100 Chapter Index Guide For Use With This Parts Catalog.

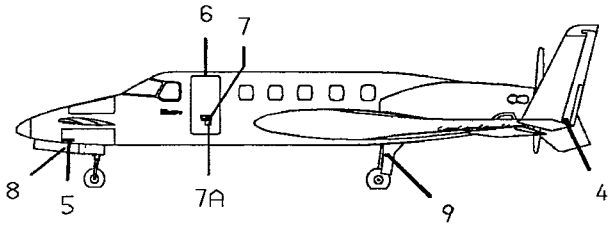
FIGURE 11-20.EXTERIOR PLACARDS
/SHEET 1 OF 6 SHEETS/

SUB-SECT UNIT & ITEM NO.		PART NO.	DESCRIPTION 1 2 3 4 5 6 7	UNITS PER ASSY	USABLE ON CODE
20-00	1	122-820111-5	PLACARD, DO NOT PUSH	1	
	2	122-810075-3	PLACARD, MAIN LANDING GEAR	4	
		122-000050-41	EXTERIOR PLACARDS INSTL	NP	
	3	50-000016	. PLACARD, NO PUSH	1	



NO PUSH — 4

AIRCRAFT NOT TO BE TOWED OR TAXIED UNLESS SKIN PANEL IS INSTALLED — 5

LEVEL POINT — 6

PUSH BUTTON FIRMLY AND HOLD

THEN PULL AND TURN HANDLE FIRMLY TO OPEN — 7

WARNING:

GROUND LOCK PINS MUST BE INSERTED IN SIDE BRACE AND LANDING GEAR CIRCUIT BREAKER PULLED BEFORE ENTERING GEAR WELL AREA — 8

STOW

OPEN — 7A

WARNING:

GROUND LOCK PINS MUST BE INSERTED IN DRAG BRACE AND DOOR MECHANISM, AND LANDING GEAR CIRCUIT BREAKER PULLED BEFORE ENTERING GEAR WELL — 9
